Group Art Unit: 2123

MAR.1 1 2002

Filed: March 16, 1999

Examiner: K. Thangavelu Technology Center 2100

For:

SIMULATION APPARATUS, SIMULATION METHOD AND COMPUTER-READABLE RECORDING MEDIUM HAVING SIMULATION PROGRAM RECORDED THEREON AS

WELL AS DESIGNING SUPPORTING APPARATUS

AMENDMENT

Assistant Commissioner for Patents Washington, D.C. 20231

Sir:

This is in response to the Office Action mailed November 2, 2001, and having a period for response set to expire on February 2, 2002. A Petition for a one-month extension of time, together with the requisite fee for same, is submitted herewith, thereby extending the period for response to March 2, 2002, which fell on a Saturday.

The following amendments and remarks are respectfully submitted. Reconsideration of the claims is respectfully requested.

IN THE SPECIFICATION:

Please REPLACE the paragraph beginning at page 10, line 27, as follows:

Further, even if, during designing of an apparatus/equipment model in which a threedimensional CAD system is used, design data are produced without performing such working as retrieval or relating operation of part models, since a simulation of working for standard part models arranged in the design data can be executed, a simulation can be performed also at an initial stage or in the designing stage. Consequently, there is an advantage that a simulation can be performed in the further upstream designing stage and checking for interference of an apparatus or equipment after completion of designing can be prevented.
